

## ActiNav 10

ActiNav™ 10 combines intelligent vision, real-time autonomous motion control and Universal Robots' world-leading cobots to deliver the core of a machine loading system. ActiNav delivers a solution that's precise, consistent, intuitive, and more agile than ever before. Perfect for picking up short tube and loading into a tube bender. This stand-alone loading system has an integrated Autoload 10 robotic arm with a 51-inch reach and includes technology that adjusts to keep production on track. With advanced vision and motion control, ActiNav's highly pre-integrated system is a game-changer. It addresses three big challenges: working with different objects, achieving consistency and precision.

- Includes the Autoload 10 robotic arm
- High payload 27.55 lbs / 12.5 kg lift
- Long reach 51.2 in / 1300 mm
- 3 positions
- Camera vision
