

ActiNav 16

ActiNav™ 16 combines intelligent vision, real-time autonomous motion control and Universal Robots' world-leading cobots to deliver the core of a machine loading system. ActiNav delivers a solution that's precise, consistent, intuitive, and more agile than ever before. This unit combined with a tube bender can help your productivity. This stand-alone loading system has an integrated Autoload 16 robotic arm with a 35.4-inch reach and offered consistency where it matters most – in productivity. With advanced vision and motion control, ActiNav's highly pre-integrated system is a game-changer. It addresses three big challenges: working with different objects, achieving consistency and precision.

- Includes the Autoload 16 robotic arm
- High payload 35.3 lbs / 16 kg lift
- Long reach 35.4 in / 900 mm
- 3 positions
- Camera vision
